### Design Your Own Blend

This page should be printed at 100%, scanned at 300dpi and emailed to [blendcreations@blendcreations.com](mailto:blendcreations@blendcreations.com) or faxed toll-free (US/Can) to 1.888.563.9220.

Please keep in mind that at the final size some details may be too fine to resolve. Engraving cannot represent greyscale — it must be either black or white. A mock-up of your art will be sent to you for final review before production. We reserve the right to reject artwork that we deem offensive or inappropriate. Corporate logos and artwork protected by copyright and not produced by you may also be rejected.

Draw or place your image on the necklace below. The grey dotted lines represent the size of the wood inlay. This is your image area. Anything outside this area will not print but will help production if you choose to create artwork that extends past the inlay's outer edge.

You Must Select One:

- Black is engraved and White is untouched**  
*Black portion of your art will be laser burned/engraved while the white portion of your art will be left untouched by the laser*
- Black is untouched and White is engraved**  
*Black portion of your art will be left untouched by the laser while the white portion of your art will be laser burned/engraved*

If you want to name/sign/date your artwork it can be added to the back. Information on the back needs to remain within the dotted line perimeter. The Blend Creations "b" will be present on the final piece as shown.
